#### 公司简介/Company Profile

浙江升祥辊业制造有限公司(SX-Roller)成立于2010年,能提供现代高速纸机上的所有辊子包胶,从成型部到复卷机的全系列产品。至今公司已经拥有很多的成功案例。无论高性能橡胶、聚氨酯、还是复合材料包胶产品,都已经被很多大纸厂客户所接受与肯定。

Zhejiang SX-Roller Manfucaturing Co., Ltd (SX-Roller) was established in 2010, able to provide roll covers for all positions from Forming to Winder section for the modern high-speed paper machine. Up to now we have had many successful running references. All series of products from Advanced Rubber to high performance PU and Composite products, have been widely accepted and used by the big mill customers.

王克祥—公司董事长兼总经理 浙江升祥觀业制造有限公司创始人

陈伟坤 (Juliawan Dwidinata)—公司常务副总 负责公司运营、管理、销售、服务等工作

Johann Spies—公司技术总监 负责公司技术转移、技术培训和产品开发等工作

SX ROLLER® — 升祥 —

升祥采用世界一流的先进包胶技术,使用市面上最好的原材料和欧洲进口包胶设备。公司拥有一支包胶行业里的专业生产人员的队伍,结合奥地利专家对生产过程的监督和质量把关,同时有急客户所急的专业销售团队并提供最高效的客户服务,升祥一定能够在银子服务行业引领潮流,成为客户的首选供应商!

At SX-Roller, we use the latest world-class roll cover technology, the state of the art machine from Europe and the highest quality material available on the market to manufacture our product. Our company consists of highly qualified workers, with long year's experiences foremen, together with the support of the European Technician; we are able to ensure our high Quality Standard is achieved. Our sales team is a team of professionals with quick response to customer needs, is able to provide efficient customer service to all of our valued customers. We believe SX-Roller will become the preferred supplier of our customers.

#### 辊子包覆层产品: **Roll Covering Service:**

高性能橡胶 - RUBBER

聚氨酯 - POLYURETHANE

复合材料 - COMPOSITE

#### 辊子机械服务: Roll Machining Service:

辊子研磨 Roll Regrinding

真空辊维修 **Suction Overhaul** 

弧形辊维修 Spreader Roll Overhaul

制作新辊体 **New Roll** 

轴头更新、修复 New Journal Or Repair

动平衡服务 **Balancing Check** 

#### 节能型聚氨酯包覆层

Energy saving polyurethane coating

超强的脱水能力

High dewatering ability

正常使用下永不脱胶

Never desonding under normal use

改善纸机运行效率

Improve the running efficiency of paper machine

纸页干度提高 1-2%

Increased paper dryness 1-2%

减少断纸次数 少50%

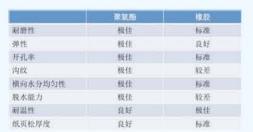

Reduce the number of paper breaks 50%

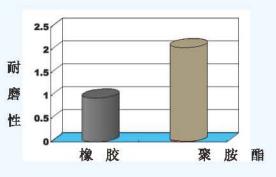

节省蒸汽用量 4-5%

Steam saving 4-5%

纸机可以提速 ↑50mpm

Paper machine speed up \$50mpm

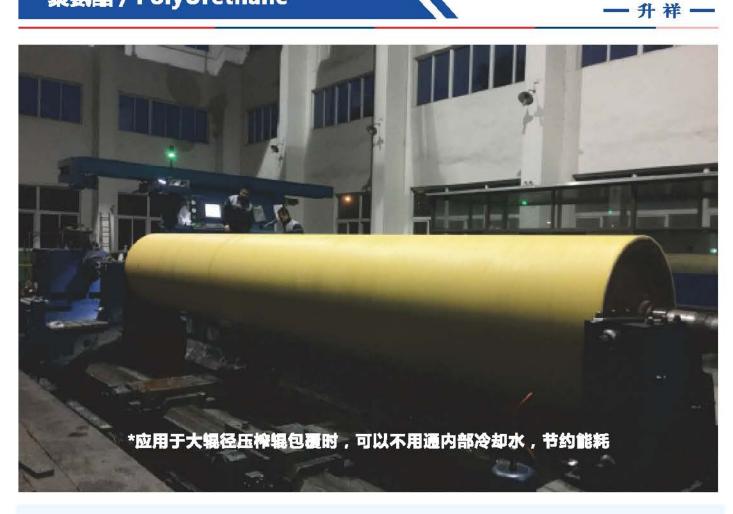

#### 以上数据仅供参考

PSA 粘接层的强度通过试验证明比聚氨酯材料本身的强度还要强,在正常的运行情况下,辊子包覆层没有脱胶的可能性。

采用最先进固化系统的高性能聚氨酯材料,弹性模量高,运行中热聚极少,运行安全。

Advanced polyurethane cover using the latest state-of-the-art curative technology, high elasticity modulus and low hysteresis, runs safely at higher speed and extreme loading.

表面设计开孔面积可以达到48%,把压区 脱水的潜力发挥到极限。

Open area up to 48%. Maximizing the dewatering efficiency up to the fullest.

先进的结构渐变粘接技术 PSA 保障最高级别的运行安全性。

The PSA ( Progressive Structure Adaptation) bonding technology provides highest operation safety

世界领先的聚氨酯旋转浇注技术,能生产出市场上最强韧聚氨酯材料。

Advanced Rotation Casting PU Technology provides the strongest PU material on the market

Imported raw materials

国外先进包胶技术

World class covering technology

全自动进口包胶设备

Fully automatic imported covering equipment

良好的动态性能

Good dynamic performances

可靠的运行安全性能

Reliable running safety performance

更长研磨周期

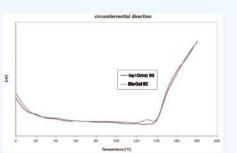

Longer regrinding period

可以现场修补

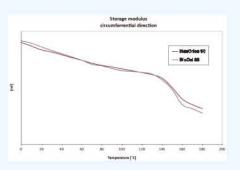

Can be repaired on-site

欧洲质量标准

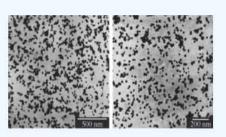

European quality standard

\*直到140℃情况下,Nanorion比Biocal保持更良好的热廉状态

"在160℃情况下,Nanorion比Bloca晚现更佳

最先进的纳米级填料环氧树脂技术, 拥有最佳渗透率的新配方

Advanced Resin with best infiltration rate and nano particle fillers technology.

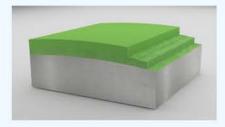

来自奥地利的世界领先包胶设备和包 胶技术,保障最高产品质量

World class equipment and roll covering technology from Austria, ensure the highest level of product quality

采用高科技纺织方法制造而成的全进 口特选先进纤维

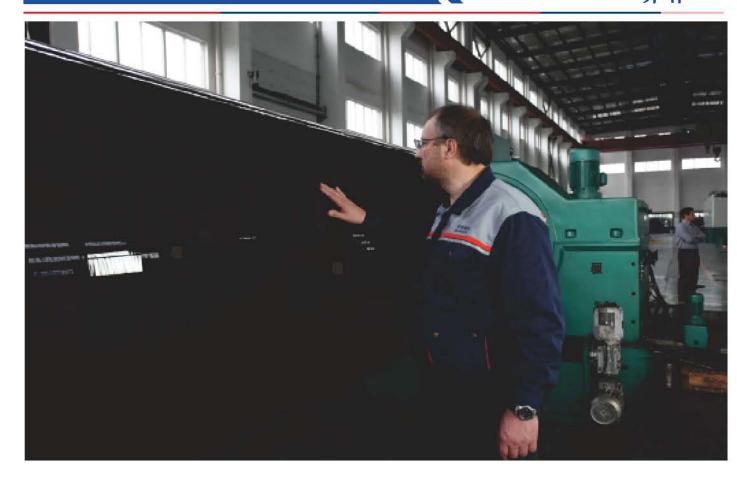

imported Fibers material with high tech weaving method

基层采用多层设计粘接技术,具有良好抗冲击性能以及更高安全性能 Multi layers bonding design for super

Multi layers bonding design for superior impact resistance and higher operation safety factor

## 源自奥地利的包胶技术

Roll covering technology from Austria

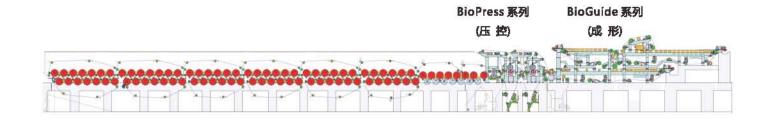

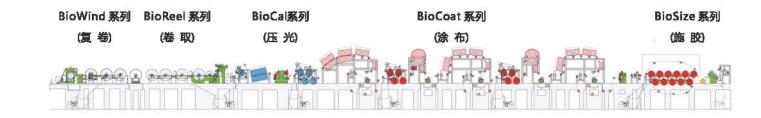

我司的高性能橡胶包 层材料的各种选择从成型部延伸到完成部。非关键辊例如驱网辊、导辊和卷纸辊的先进橡胶配方都采用合成橡胶加上特殊填料,以提高包 层在机器上的运行性能。至于关键辊位置的包 层例如各种压榨辊、施胶、以及涂布辊,我司采用世界领先的橡胶配方结合高端合成橡胶材料、特选填料以及专用纤维制造而成。整个生产管理按照欧洲质量标准来保证产品质量长期稳定。我司的包胶产品已经在各种纸机的各个部位成功运行并且已得到最终使用户的认可。

Our high performance Rubber cover selections are extended from Forming section to Winding section. The non-critical position covers such as wire driven rolls, guide rolls, and reel spools are using advanced formulation with premium synthetic rubber and special fillers to enhanced the cover performance in the machine. And for the Critical position covers such as different kind of Press, Sizing and Coating rolls are using world class compound formulations, with a combination of high end Premium Synthetic Rubber, selected fillers and advanced fibers material. The manufacturing process is managed according to European quality standard management system to ensure the product quality stability over a longer period of time. Our products have been used in every position in the paper machine and proven well accepted by the customers.

#### 大辊径压榨辊 / Jumbo Press Roll

聚氨酯 / PolyUrethane

客户 / Customer: 吉城纸业 / Jicheng Paper 车速 Speed: 900mpm

品名Trademane: BioPress P 线压力Load: 350 kN/m

尺寸 Dimension: 1500 x 5200mm 纸种 Paper: TestLiner

备注:客户很满意我司产品的脱水效果,出了压区的毛布水分比进压区的还要干,我司立即得到客户的重复订单。

Note: Customer was very satisfied with the dewatering result, the felt was dryer after the press nip compared to before, and a repeat order was awarded to us immediately.

#### 类似业绩 / Similar Reference:

# 高性能网毯导辊 / High Performance wire felt guide rolls 复合材料 / Composite

客户/Customer: 江苏理文/Jiangsu Lee&Man Paper 车速Speed: 1000mpm

品名Trademane: BioGuide P/G 数量Quantity: 22 rolls

备注:原来所有导辊是使用橡胶材料的,但是辊面磨损比较快,使用周期缩短。我司推荐使用BioGuide G 导辊专用复合材料,客户使用之后非常满意。使用结果是周期能够达到原来的三倍,而且运行下来辊 面还比以前还更干净了,大大改善导辊类的运行效果。

Note: Previously all Guide Rolls are using rubber cover material, but wear resistance issue result in short Intervals. After using BioGuide G composite cover material especially designed for Guide roll positions, customer is very satisfied. The wear resistance is able to reach three times longer, and it runs cleaner, insanely improve the performance of the guide rolls.
